SUMMARY

Full-Stack Developer with 3+ years of experience designing and building scalable web applications, SaaS platforms, e-commerce systems, and business solutions. Experienced in turning complex business requirements into reliable, maintainable products, with a strong focus on clean architecture, performance, scalability, and delivering solutions that create real business value.

SKILLS

Frontend: Next.js, React.js, TypeScript, Tailwind CSS, shadcn/ui, Material UI, Chakra UI, PrimeReact, Radix UI, Redux Toolkit, React Query, TanStack Query, Framer Motion.

Backend: NestJS, Node.js, Express.js, Fastify, REST APIs, Webhooks, Socket.io, JWT, Passport.js, Template Engines, Swagger/OpenAPI.

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma ORM, TypeORM, Sequelize.

DevOps & Tools: DigitalOcean, Vercel, Nginx, GitHub Actions, Redis, BullMQ, AWS S3, Firebase FCM, Twilio

Product Areas: SaaS platforms, e-commerce systems, admin dashboards, merchant dashboards, logistics systems, B2B platforms, healthcare systems, real estate platforms.

Current Focus: GraphQL, testing, system design

SELECTED PROJECTS

Egapy (Multi-Tenant E-Commerce SaaS & OMS) | Full-Stack Developer

A modern ERP solution designed to help Merchant and businesses of all sizes streamline their operations and grow efficiently.

Key Technical Contributions:

- Multi-Tenant Architecture: Architected scalable multi-tenant SaaS backend with dynamic tenant resolution middleware, strict data isolation, and configurable tenant-level settings across 40+ domain modules.
- Omnichannel E-Commerce Ingestion: Engineered real-time bidirectional synchronization pipelines for Shopify, WooCommerce, EasyOrders, and Lightfunnels, featuring HMAC webhook verification, batched product imports, and idempotent order creation.
- Logistics & Shipping Aggregator: Built a unified multi-carrier gateway integrating Bosta, Mylerz, and Aramex, automating label generation, shipment lifecycle tracking, pickup routing, and governorate/district pricing matrices.
- SaaS Billing & PAYG Monetization: Developed a multi-tiered subscription engine with automated recurring billing, Pay-As-You-Go (PAYG) overage debiting, wallet transactions, and Kashier payment gateway integration, complete with MRR/ARR analytics.
- Designed and developed the Super Admin platform: providing centralized control over tenant organizations, roles and permissions, subscriptions, pricing, financial metrics, and platform-wide operations. Built secure multi-tenant administration workflows, SaaS monetization tools, tenant management, reporting and support infrastructure to enable scalable platform operations.
- DevOps & CI/CD: Configured automated GitHub Actions deployment pipelines with zero-downtime rsync deployments, Prisma migration deployment hooks, and production environment segregation.

Tech Stack:

Frontend: Next.js 16 (App Router), React 19, TypeScript, Redux Toolkit, Tailwind CSS, shadcn/ui, Multilingual support, TanStack Table/Virtual, Recharts, next-intl (i18n / RTL).

Backend: NestJS, TypeScript, PostgreSQL, Prisma, Webhooks

Cloud, Security & Tools: AWS S3, Twilio API, Swagger/OpenAPI, Nginx.

Labaik (Enterprise Umrah & Pilgrimage Management Ecosystem) | Full-Stack Developer

Architected and developed a full-scale digital platform designed to streamline Umrah pilgrimage operations, real-time pilgrim tracking, and automated service workflows. The ecosystem connects pilgrims, service providers, and administrators through a high-performance backend, an analytical dashboard, and a localized multi-language landing platform.

Key Technical Contributions:

- **Modular Backend Architecture:** Engineered a modular, domain-driven RESTful API using NestJS and TypeScript, managing high-concurrency business logic, pilgrimage lifecycles, and role-based access control (RBAC).
- **Interactive Analytics Dashboard:** Built a responsive administrative and client portal using Next.js and React, featuring real-time data visualization with Recharts.
- **Designed and developed a high-converting, accessible marketing and informational web platform for Labika.** Built to drive app downloads and user onboarding, the site features localized content delivery, interactive touch carousels, fluid scroll animations, and optimized Core Web Vitals.
- **Financial & Wallet System:** Integrated a multi-gateway digital wallet architecture handling transactions and automated withdrawals across Binance (Crypto), PayPal, and Direct Bank Transfers.
- **Real-Time Communication & Notifications:** Implemented bidirectional real-time messaging using Socket.io alongside an asynchronous notification worker powered by BullMQ, Redis, Firebase Admin (FCM), and Twilio (SMS).
- **Global Localization & Performance:** Configured full internationalization (next-intl) with dynamic RTL (Arabic) / LTR (English) layout switching and virtualized large datasets using TanStack Virtual & Table.
- **Data Integrity & Storage:** Designed relational schemas and optimized queries with TypeORM / MySQL, automating secure document and media asset management via AWS S3.

Tech Stack:

Frontend: Next.js 16 (App Router), React 19, TypeScript, Redux Toolkit, Tailwind CSS, Shadcn Ui, TanStack Table/Virtual, Recharts, next-intl (i18n / RTL).

Backend: NestJS, Node.js, TypeScript, TypeORM, MySQL, Redis, BullMQ, Socket.io.

Cloud, Security & Tools: AWS S3, Firebase (FCM), Twilio API, Passport.js (JWT), Swagger/OpenAPI, Docker, Nginx.

Buy From Egypt - B2B Export Platform | Frontend Developer

A B2B export platform connecting Egyptian exporters with global buyers through business profiles, product listings, and communication workflows — integrated with a custom-built machine learning model that chats with and answers users.

Key Technical Contributions:

- Engineered a scalable B2B trade platform connecting verified Egyptian exporters with global buyers.
- Implemented real-time supplier-buyer negotiation messaging and online presence tracking
- Integrated an AI trade assistant with session handling to streamline product discovery and support.
- Built a high-performance marketplace with debounced search, dynamic multi-attribute filtering, and infinite scrolling.
- Developed secure multi-step authentication (OTP verification, password reset, trade preferences).

Tech Stack: Next.js 15, React 19, TypeScript, RTK Query, Socket.io, Tailwind CSS, Zod

Coldwell Banker - New ALEX Real Estate Platform | Full-Stack Developer

A real estate platform in the spirit of Nawy

Key Technical Contributions:

- Developed a real estate platform with property discovery, advanced filtering, interactive maps, multilingual support, and SEO-focused pages.
- Implemented real estate browsing workflows inspired by modern marketplace experiences for regional property search and lead generation

Tech Stack:

Frontend: Reactjs, GoogleMaps, Multilingual Support, SEO Optimization.

Backend: Nodejs, expressjs, mongodb.

GEDO | Backend Developer

An Alzheimer's care management system helping caregivers and family members manage medication, health tracking, communication, and daily activity monitoring for patients.

Key Technical Contributions:

- Built a secure backend system for Alzheimer care management with medication tracking, health monitoring, and daily activity logs.
- Designed REST API workflows focused on caregiver support, structured health data, security, and reliable data management.

Tech Stack: Node.js, Express.js, MongoDB, Security, REST APIs.

Work Experience

Freelance Full-Stack Developer

2022 – Q2 2024

- Designed and developed web applications and business platforms for clients across different industries.
- Built complete solutions from requirements and database design to backend APIs and frontend interfaces.
- Implemented custom business workflows, dashboards, authentication, and third-party integrations.
- Collaborated directly with clients to translate business requirements into practical technical solutions.

Full-Stack Developer — Ecombo

Q3 2024 – Q2 2026

- Developed and maintained scalable web applications and e-commerce solutions.
- Built backend services, APIs, dashboards, and business workflows across the platform.
- Designed and implemented complex features with a focus on performance, maintainability, and scalability.
- Worked closely with product and business requirements to deliver reliable production-ready solutions.

Freelance Full-Stack Developer

Q3 2026 – Present

- Building custom web applications, SaaS platforms, and business solutions for clients.
- Handling projects end-to-end, from architecture and development to integration and deployment.
- Helping businesses turn their requirements into scalable and maintainable digital products.

EDUCATION

E.G.O.T.H Institute, Alexandria

Bachelor's Degree in Tourism & Hotels

- **Graduated: 2026**

Full-Stack Web Development Training

Self Academic | 1.5 Years

- Completed practical full-stack web development training focused on frontend and backend development.
- Gained hands-on experience with HTML, CSS, JavaScript, React, Node.js, MongoDB.

Self-Learning & Practical Development

- Continuously improving full-stack development skills through self-learning and real-world projects, including Next.js, TypeScript, NestJS, PostgreSQL, Prisma, REST APIs, authentication, integrations, deployment workflows, and system design.
